

Publications resulting from the project

2000

Platero C, Verbiest K, Úbeda A, Trillo MA, Gonsalvez J, Bartolomé J (2000) Platform opened for the processing and management of biomedical images. XXI Jornadas of Automática: 1-7

2002

Ivancsits S, Diem E, Rüdiger HW, Jahn O (2002) Induction of DNA strand breaks by intermittent exposure to extremely-low-frequency electromagnetic fields in human diploid fibroblasts. *Mutation Res* 519: 1-13

Leszczynski D, Joenväärä S, Reivinen R, Kuokka R (2002) Non-thermal activation of hsp27/p38MAPK stress pathway by mobile phone radiation in human endothelial cells: Molecular mechanism for cancer- and blood-brain barrier-related effects. *Differentiation* 70: 120-129

Platero C, Trillo MA, Úbeda A (2002) Processing of biochemical images for the study of the influence of GSM electromagnetic radiation on neural stem cells. XXIII Jornada of Automática: 1-7

2003

Ivancsits S, Diem E, Jahn O, Rüdiger HW (2003) Intermittent extremely low frequency electromagnetic fields cause DNA damage in a dose dependent way. *Int Arch Occup Env Health* 76: 431-436

Ivancsits S, Diem E, Jahn O, Rüdiger HW (2003) Age-related effects on induction of DNA strand breaks by intermittent exposure to electromagnetic fields. *Mech Age Dev* 124: 847-850

Schuderer J, Kuster N (2003) Effect of the meniscus at the solid/liquid interface on the SAR distribution in petri dishes and flasks. *Bioelectromagnetics* 24: 103-108

2004

Capri M, Mesirca P, Remondini D, Carosella S, Pasi S, Castellani G, Franceschi C, Bersani F (2004) 50 Hz sinusoidal magnetic fields do not affect human lymphocyte activation and proliferation in vitro. *Phys Biol* 1: 211-219

Capri M, Scarcella E, Bianchi E, Fumelli C, Mesircas P, Agostini C, Remondini D, Schuderer J, Kuster N, Franceschi C, Bersani F (2004) 1800 MHz radiofrequency (mobile phones, different Global System for Mobile communication modulations) does not affect apoptosis and heat shock protein 70 level in peripheral blood mononuclear cells from young and old donors. *Int J Radiat Biol* 80(6): 389 -397

Czyz J, Guan K, Zeng Q, Nikolova T, Meister A, Schönborn F, Schuderer J, Kuster N, Wobus AM (2004) High frequency electromagnetic fields affect gene expression levels in tumor suppressor p53-deficient embryonic stem cells. *Bioelectromagnetics* 25: 296-307.

Czyz J, Nikolova T, Schuderer J, Kuster N, Wobus AM (2004) Non-thermal effects of power-line magnetic fields (50 Hz) on gene expression levels of embryonic stem cells – the role of tumour suppressor p53. *Mutation Res* 557(1): 63-74.

Leszczynski D, Nylund R, Joenväärä S, Reivinen J (2004) Applicability of discovery science-approach to determine biological effects of mobile phone radiation. *Proteomics* 4: 426-431

Nylund R, Leszczynski D (2004) Proteomics analysis of human endothelial cell line EA.hy926 after exposure to GSM 900 radiation. *Proteomics* 4: 1359-1365

Pilger A, Ivancsits S, Diem E, Steffens M, Kolb HA, Rüdiger HW (2004) No effects of intermittent 50 Hz EMF on cytoplasmic free calcium and on the mitochondrial membrane potential in human diploid fibroblasts. *Radiat Envir Biophys* 43(3): 203-7

Schuderer J, Schmid T, Urban G, Kuster N (2004) Novel high resolution temperature probe for RF dosimetry. *Physics in Med and Biol* 49: N83-N92

Schuderer J, Samaras T, Oesch W, Spät D, Kuster N (2004) High peak SAR exposure unit with tight exposure and environmental control for in vitro experiments at 1800 MHz. *IEEE Transactions on Microwave Theory and Techniques* 52(8): 2057-2066

Schuderer J, Spät D, Samaras T, Oesch W, Kuster N (2004) In vitro exposure systems for RF exposures at 900 MHz. *IEEE Transactions on Microwave Theory and Techniques* 52(8): 2067-2075

Schuderer J, Oesch W, Felber N, Kuster N (2004) In vitro exposure apparatus for ELF magnetic fields. *Bioelectromagnetics* 25(8): 582-91

Ventura C, Maioli M, Asara Y, Santoni D, Mesirca P, Remondini D, Bersani F (2004) Turning on stem cell cardiogenesis with extremely low frequency magnetic fields. *The FASEB J* 19(1): 155-7

2005

Diem E, Jahn O, Rüdiger HW (2005) Non-thermal DNA breakage by mobile phone radiation in human fibroblasts and transformed GFSH-R17 (rat granulosa) cells in vitro. *Mutation Res* 583(2): 178-83

Ivancsits S, Pilger A, Diem E, Jahn O, Rüdiger HW (2005) Cell type specific genotoxic effects of intermittent extremely low frequency electromagnetic fields. *Mutation Res* 583(2): 184-88

Nikolova T, Czyz J, Rolletschek A, Blyszczuk P, Fuchs J, Jotchev G, Schuderer J, Kuster N, Wobus AM (2004) Electromagnetic fields affect transcript levels of apoptosis-related genes in embryonic stem cell-derived neural progenitor cells. *FASEB J* 19(12): 1686-8

Winker R, Ivancsits S, Pilger A, Adlkofer F, Rüdiger HW (2005) Chromosomal damage in human diploid fibroblasts by intermittent exposure to extremely low frequency electromagnetic fields. *Mutation Res* 585(1-2): 43-9

2006

Antonini RA, Benfante R, Gotti C, Moretti M, Kuster N, Schuderer J, Clementi F, Fornasari D (2006) Extremely low-frequency electromagnetic field (ELF-EMF) does not affect the expression of alpha3, alpha5 and alpha7 nicotinic receptor subunit genes in SH-SY5Y neuroblastoma cell line. *Toxicol Lett* 164(3): 268-77

Nylund R, Leszczynski D (2006) Mobile phone radiation causes changes in gene and protein expression in human endothelial cell lines and the response seems to be genome- and proteome-dependent. *Proteomics* 6: 4769-4780

Remondini D, Nylund R, Reivinen J, Poulletier de Gannes F, Veyret B, Lagroye I, Haro E, Trillo A, Capri M, Schlatterer K, Gminski R, Fitzner R, Tauber R, Schuderer J, Kuster N, Leszczynski D, Bersani F, Maercker C (2006) Gene expression changes in human cells after exposure to mobile phone microwaves. *Proteomics* 6: 4745-4754

2008

Benfante R, Antonini RA, Kuster N, Schuderer J, Maercker C, Adlkofer F, Clementi F, Fornasari D (2008) The expression of PHOX2A, PHOX2B and of their target gene dopamine-beta-hydroxylase (Dbeta H) is not modified by exposure to extremely-low-frequency electromagnetic field (ELF-EMF) in a human neuronal model. *Toxicol In Vitro* 22(6): 1489-95
